

Dear Trainees,

We are delighted to announce the launch of the next STAR project:

Perioperative Replacement of Exogenous Steroids The PREdS Study

We are looking for enthusiastic trainees to take part in this prospective, multicentre study to assess the number of patients presenting for elective, urgent or emergency procedures who are taking long-term oral steroids and determine how perioperative steroid replacement is currently being managed.

Data collection will include **all patients** aged ≥ 18 years, having procedures that require input of an anaesthetist (general anaesthesia, regional anaesthesia, and/or sedation with monitoring), across all medical and surgical specialties.

Data collection will take place over any consecutive 14 day period within the study window commencing November 2022.

Local investigators will receive certificates of participation and will be named as a PubMed-indexed collaborators on any resulting publications.

More details including the full protocol, FAQs and Training videos can be found on our webpage at: XXXX

Any queries contact the study team: predsstudy@gmail.com.
